ACKNOWLEDGEMENT

At every outset I express my gratitude to almighty lord for showering his grace and blessings upon me to complete this project.

Although our name appears on the cover of this book, many people had contributed in some form or the other form to this project Development. I could not done this project without the assistance or support of each of the following I thank you all.

I wish to place on my record my deep sense of gratitude to my project guide, **Shri. JutangSwer, Software Solutions**, for his constant motivation and valuable help through the project work. Express my gratitude to **Mrs. Aiom M. Mitri**, Head of the **Department Computer Sciences and Application**, Shillong College for her valuable suggestions and advices throughout the year course. I also extend my thanks to other Faculties for their Cooperation during my Course.

Finally I would like to thank my friends for their cooperation to complete this project.

ABSTRACT

This Application is to give the news and news updates exclusively in Khasi. Till date there is no any news apps in Khasi.

Preface

Contents

❖ INTRODUCTION

- INTRODUCTION OF PROJECT
- PURPOSE OF THE SYSTEM

❖ SYSTEM ANALYSIS

- STUDY OF THE SYSTEM
- SYSTEM REQUIREMENT

❖ SYSTEM DESIGN

- E-R DIAGRAM
- DATA FLOW DIAGRAMS

❖ CODING

❖ SYSTEM TESTING AND IMPLEMENTATION

❖ CONCLUSION

❖ BIBLIOGRAPHY

❖ INTRODUCTION

This Mawphor Application is a serial publication containing news about current events, other informative articles about politics, sports, arts, and so on, and advertising. Newspapers are now published online as well as in print. The online versions are called Mawphor or Mawphorwebsites. Newspapers are typically published daily or weekly.

• PURPOSE OF THE APPLICATION

The main purpose of this Mawphor apps are to inform, interpret and entertain. Mawphor help readers become informed by providing them with facts, statistics and opinion columns.

❖ SYSTEM ANALYSIS

• STUDY OF SYSTEM

Till date there is no any Khasi news android application.

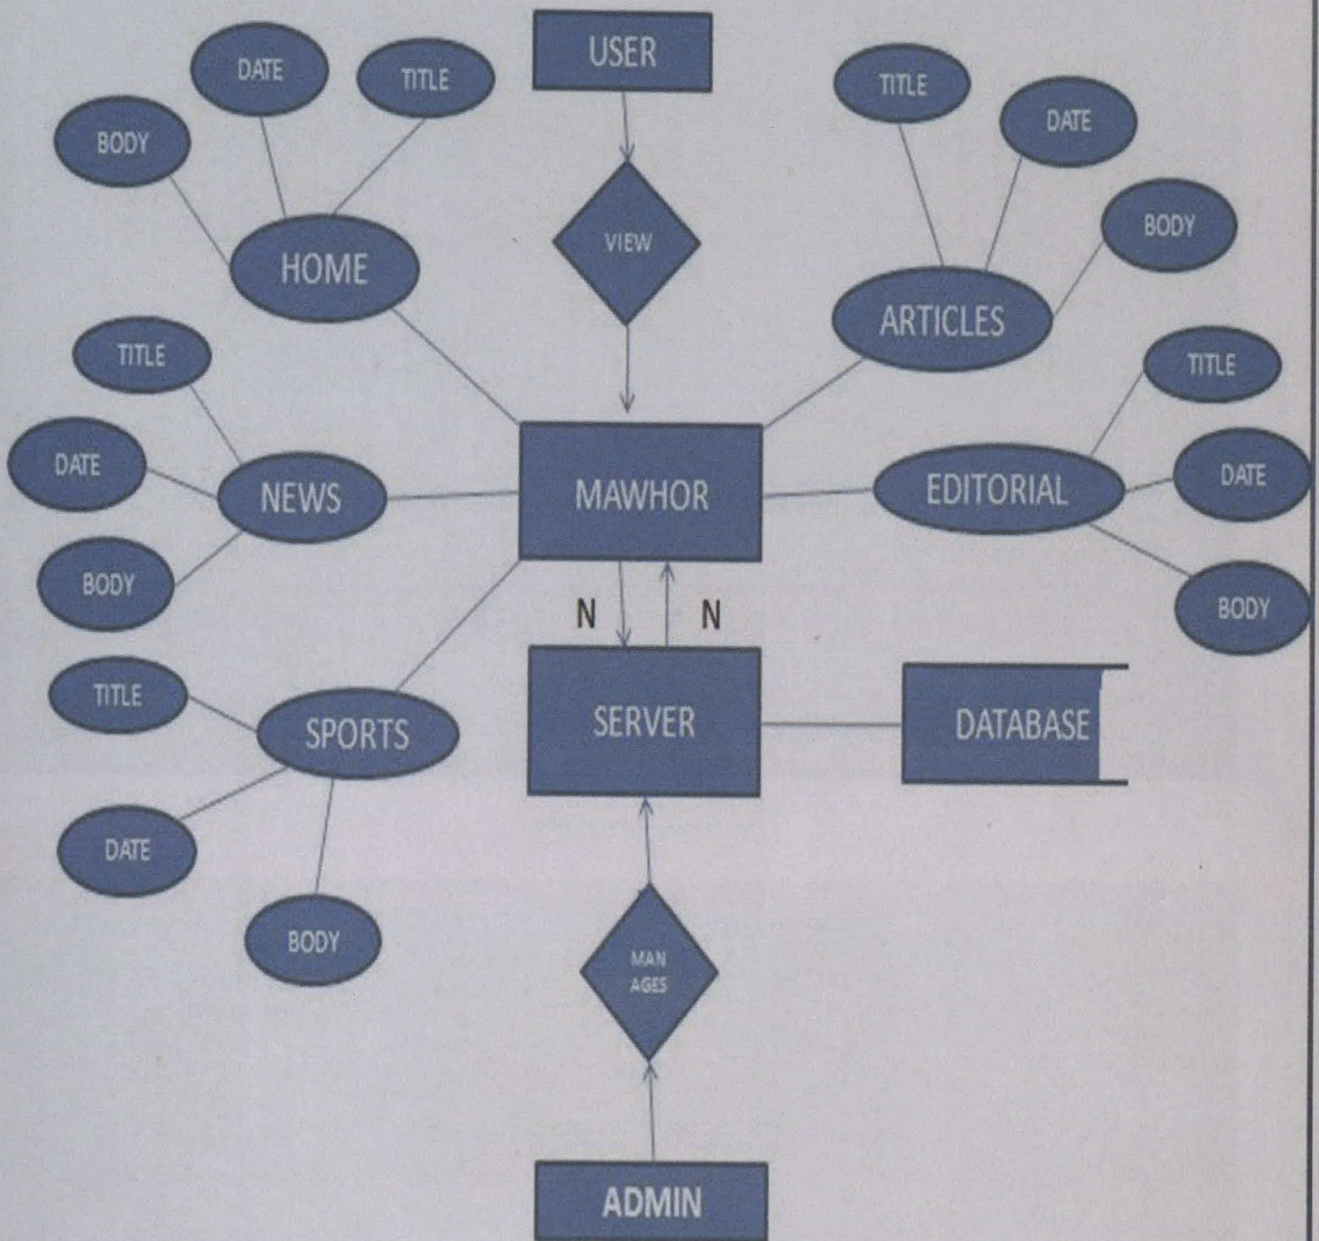

• System requirement

Hardware Requirements: Android Mobile Phones

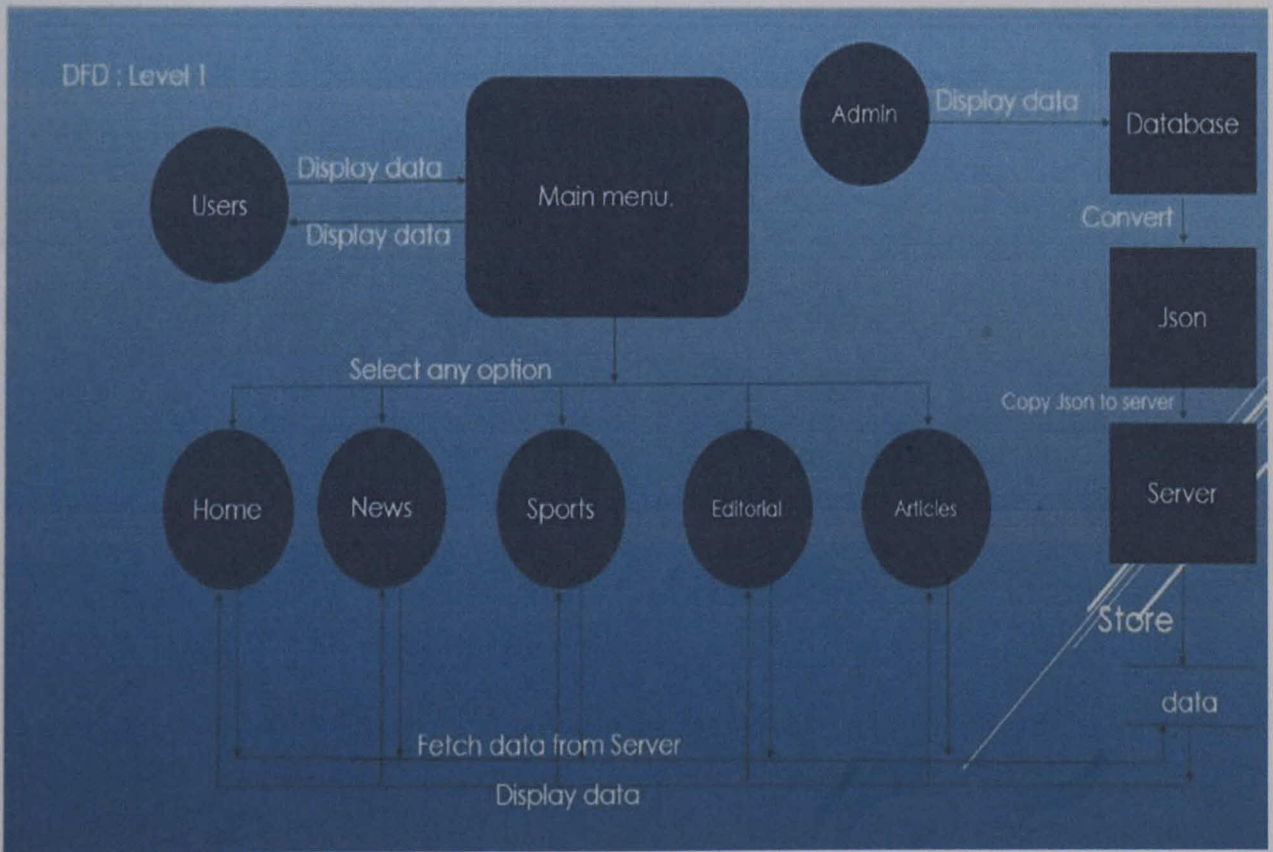

Software Requirements:

1. OS – Android 4.1 above (Jelly Bean).
2. RAM – 256MB minimum
3. Storage – 15.17MB
4. System Requirements – Single Core above

```

❖ SYSTEM TESTING AND IMPLEMENTATION

❖ Conclusion

It has been a great pleasure for me to work on this exciting and challenging project. This project proved good for me as it provided practical knowledge of not only programming in Android Studio Using Java, includes json ,sql database, android application and WAMP Server, but also about all handling procedure related with "Mawphor". It also provides knowledge about the latest technology used in developing enabled application and client server technology that will be great demand in future. This will provide better opportunities and guidance in future in developing projects independently.

Advantage:

The project is identified by the merits of the system offered to the user. The merits of this project are as follows: -

- It's an application project.
- This is very helpful for the client to enter the desired information through so much simplicity.
- Data storage and retrieval will become faster and easier to maintain because data is stored in a systematic manner and in a single database.
- Less need of writing for newspapers to be delivered to the people.
- People does not need to wait and buy the newspaper.
- It makes easy for a rural areas to get daily news once they have this application.
- Every one can use this application (Using Android Mobiles Phones).

LIMITATIONS:

- The size of the database increases day-by-day, increasing the load on the database back up and data maintenance activity.
- Training for simple computer operations is necessary for the users working on the system.
